# Beyond Hadoop — PHEMI Central is a fully integrated solution

## Introducing A Powerful, New Way to Manage (and something more) Your Organization's Data

Other big data platforms make use of Hadoop's distributed file system capabilities. But unlike conventional DIY Hadoop platforms, PHEMI Central is a fully integrated solution that combines the Hadoop ecosystem with industry-pioneering privacy, security, and governance features and sophisticated indexing, cataloguing, and data management features. PHEMI takes the best of big data and traditional enterprise information management capabilities and significantly expands upon them to offer organizations a robust yet flexible solution for collecting, curating, and consuming sensitive data at scale.
