Audit Log

See how PHEMI Central has been accessed and used by viewing the **Audit Log**.

The log tracks all accesses to PHEMI Central: through the RESTful API or through the PHEMI Central.

PHEMI Central maintains complete a complete audit log of system and user operations. Log entries include all create, modify, and delete operations performed through the Management and Governance Console, along with a record of all data access queries made to the system through the PHEMI RESTful API. Audit Log files are completely tamperproof for all users.

View the Audit Log

View the Audit Log on the **Audit Log** page.

To view the Audit Log:

1.

Open the **Audit Log** page, by clicking the **Audit Log** icon in the left navigation bar.

The **Audit Log** page opens.

2. Set your query options.

Option	Description
From	Optional. The start time of log entries. The format for the date is *yyyy-mm-dd*. The format for the time is *hh:mm*, in 24-hour format. The default is the current date and time. Leaving the default From and To values shows the complete log file.
To	Optional. The stop time of log entries. Choose the current time by checking the Now checkbox,or uncheck the Now checkbox and specify a time using *yyyy-mm-dd* for the date and *hh:mm*, in 24-hour format, for the time. The default is Now. Leaving the default From and To values shows the complete log file.

Option	Description
Filter	Optional. Use a filtering expression to filter the log messages. *What filtering expressions can I use?*
Display Order	Optional. The order in which log messages are displayed. Choose between displaying the newest entries first or the oldest entries first. By default, newest entries are displayed first.

3. Click **Load Records** to retrieve the specified log messages.
